Subject: Not possible to get .t files

Hello all

I have compiled and run successfully AllForI18n in Linux and after exporting the .tr file, this appears empty only with:

LANGUAGE "ES-ES UTF-8";

and I get in the lower side a window with:

/home/upp/uppsrc/CtrlLib/CtrlLib.t(20): invalid language
/home/upp/uppsrc/Web/Web.t(22): invalid language
/home/upp/uppsrc/RichEdit/RichEdit.t(20): invalid language
/home/upp/uppsrc/GridCtrl/GridCtrl.t(13): invalid language
/home/upp/uppsrc/Oracle/Oracle.t(16): invalid language
/home/upp/uppsrc/CtrlCore/CtrlCore.t(14): invalid language
/home/upp/uppsrc/Core/Core.t(20): invalid language

when I double click over the lines it sends me to the messages in Taiwanese. For example, in CtrlLib.t:

T_("(default)")

deDE("(Voreinstellung)")
esES("(por defecto)")
fiFI("(oletus)")
frFR("")

itIT("(predefinito)")

roRO("(implicit)")
ruRU("")
srSP("")

the "/home/upp/uppsrc/CtrlLib/CtrlLib.t(20): invalid language" error moves the cursor over the line

It is the same in the rest of .t files.

Do you know what to do?

Best regards
