Subject: How to select a starting directory for the FileSel

Hello,

Each time I open a FileSel dialog it starts from the root of my PC. Instead I would like to set the directory from where to start. I used the method BaseDir, for example:

```
fs.BaseDir("C:\\MyApps\\Vega2\\souceVega");
```

In this case it starts from C:\\MyApps\\Vega2\\souceVega but I cannot move back from that level because the button dirup is disabled!
So I tried

```
fs.dirup.Enable(); //fs.dirup.Enable(true);
fs.BaseDir("C:\\MyApps\\Vega2\\souceVega");
```

with no success. Any idea?

Moreover I would like to get my application directory to supply to FileSel but how can I get it?

Luigi
