Problem: I can't create a topic about a database field in a .sch file if the type of the field is INT64_

Solution:

Add a line in ide/Browser/Sch.cpp (starting around line 99)

```
  if(p.Id("LONGRAW") || p.Id("LONGRAW_") || p.Id("BLOB") || p.Id("BLOB_") ||
     p.Id("STRING_") || p.Id("STRING") || p.Id("CLOB") || p.Id("CLOB_"))
   r << "\tString " << ReadId(p, rr) << ";";
  else
  if(p.Id("INT") || p.Id("INT_") || p.Id("SERIAL") || p.Id("ISERIAL"))
   r << "\tint " << ReadId(p, rr) << ";";
  else
  if(p.Id("INT64") || p.Id("INT64_") || p.Id("SERIAL") || p.Id("ISERIAL"))
   r << "\tint64 " << ReadId(p, rr) << ";";
  else
  if(p.Id("DOUBLE") || p.Id("DOUBLE_"))
   r << "\tdouble " << ReadId(p, rr) << ";";
  else
  if(p.Id("TIME") || p.Id("TIME_"))
   r << "\tTime " << ReadId(p, rr) << ";";
  else
  if(p.Id("DATE") || p.Id("DATE_"))
   r << "\tDate " << ReadId(p, rr) << ";";
  else
  if(p.Id("BIT") || p.Id("BIT_") || p.Id("BOOL") || p.Id("BOOL_"))
```
