Hello All,
I try compile ide with lpbuild.
When compile I have error:

...
Compiling Core/Cpu.cpp (flags DARWIN GCC GUI POSIX SHARED) ...
uppsrc/Core/Cpu.cpp: In function 'void Upp::sCheckCPU()':
uppsrc/Core/Cpu.cpp:40: error: PIC register '%ebx' clobbered in 'asm'
make[1]: *** [_out/Core/DARWIN_GCC_GUI_POSIX_SHARED/Cpu.o] Error 1
make: [ide] Error 2 (ignored)
Everything done.

and

...
Compiling Core/Mt.cpp (flags DARWIN GCC GUI MT POSIX SHARED) ...
uppsrc/Core/Mt.cpp:75: error: thread-local storage not supported for this target
make[1]: *** [_out/Core/DARWIN_GCC_GUI_MT_POSIX_SHARED/Mt.o] Error 1
make: [ide] Error 2 (ignored)
Everything done.

how fix it?
