when I use MinGW (gcc4.6) to build Core to static library,I get the problem:Value.cpp | 168 | note:type was declared here .
The file is Value.cpp ,line 168 .How can I solve this problem,Thanks.

```
166 void Value::Serialize(Stream& s) {
167 sRegisterStd();
168 dword type;
169 if(s.IsLoading()) {
```
