Subject: Problem with StringReplace [solved]

Hi all!

I was looking for a simple replace function - after a while of searching found such function in "TCore". But what I want to do doesnt work - maybe I do something wrong:

I have some Strings ...

Vector<String> Lines;

... and fill them ...

Lines = Split(LargeStringFromFile, ASeparator, false);

... and now I want to replace something in each line:

```
for (int i = 0; i < Lines.GetCount(); i++)
{
 Lines.At(i) = StringReplace(Lines.At(i), "Something", "SomethingElse");
}
```

Lines.At(i) seems to do not contain what i expect. Some suggestions?

Thanks in advance,

WebChaot.
