Subject: Errors during compiling the examples

Hello everybody,

I'm new to GUI programming and Ultimate++.

```
#include <CtrlLib/CtrlLib.h>
//#define _WIN32_WINNT 0x501

using namespace std;
using namespace Upp;

GUI_APP_MAIN {

   PromptOK("Hello world");

}
```

I tried at first to compile the examples. Unfortunately I get errors in the example above:

```
D:\upp\uppsrc\Core\Socket.cpp: In function 'int Upp::sGetAddrInfo(const char*, const char*,
addrinfo**)':
D:\upp\uppsrc\Core\Socket.cpp:44:47: error: 'getaddrinfo' was not declared in this scope
  return getaddrinfo(host, port, &hints, result);
                                         ^
D:\upp\uppsrc\Core\Socket.cpp: In static member function 'static DWORD
Upp::IpAddrInfo::Thread(void*)':
D:\upp\uppsrc\Core\Socket.cpp:65:24: error: 'freeaddrinfo' was not declared in this scope
     freeaddrinfo(result);
```

I'm compiling with MinGW. What do I have to do?

Regards

Marco
