Hi!

You can get the IP from the Accept method. I do it like this.

```
Socket m_Socket, m_Connection;  
dword m_ipaddr;  
String sIP;
```

```
m_Socket.Accept(m_Connection, &m_ipaddr, true, 100);  
sIP = FormatIP(m_ipaddr);
```

Hope this helps.

Happy coding.
