On some presentations (OS layout themes), the selected tabs can not be distinguished well.

Would not it be good if the tab were also dyed?
Or this behavior should be additionally switched on / off?

in

void TabBar::PaintTab(Draw &w, const Size &sz, int n, bool enable, bool dragsample)

instead of

```
 if(!IsNull(t.col))
 {
  img = Colorize(img, t.col);
 }
```

```
 if(!IsNull(t.col) && ac )              // change dagobert -> if(!IsNull(t.col)) 19_03_2016
 {
  img = Colorize(img, t.col);
  img = ColorMask(img, t.col);       // add dagobert 19_03_2016
 }
```

and here our patchfiles -> current release 2015.2 (rev 9251):
