The question may seems stupid but since last version of theIDE, it auto format my code when I'm writting :
This code :

```
{
    Array<VkQueueFamilyProperties> allQueues =
move(physicalDevice.GetPhysicalDeviceQueueFamilyProperties())
}
```

became :

```
{
   Array<VkQueueFamilyProperties> allQueues =
   move(physicalDevice.GetPhysicalDeviceQueueFamilyProperties());
}
```

the moment I put the semi-colon.

Disabling all setups in Code formatting and Assist menus is not preventing TheIDE to auto format my code.
How can I disable this feature ?

Deleting my theIDE.cfg and relaunching TheIDE fixed the issue
