When i run (f5) my application within TheIDE my app does not start anymore after compiling and linking:

prohibisZA: 12 file(s) built in (0:05.92), 493 msecs / file, duration = 6000 msecs, parallelization 0%
Linking...
(option '-O 2' ignored)
___main: duplicate
-> used: libmingw32.a:gccmain.o:1
-> discarded: libgcc.a:__main.o:1
C:\Programme\UPP\out\MINGW.Blitz.Gui\prohibisZA.exe (1863680 B) linked in (0:01.01)

OK. (0:08.64)

I found an prohibisZA.log in my output-directory:

* C:\Programme\UPP\out\MINGW.Blitz.Gui\prohibisZA.exe 17.05.2007 16:36:40, user: Michael

failed:

What's going on?

Michael
