Subject: UppHub / Plugin directory

Hello,

After reading the UppHub instractions here https://www.ultimatepp.org/appideUppHub_en-us.html, It says all packages have to be root or in Plugin directory

I would like to have a directory in which all addons specific to my package would be grouped (instead of beeing mixed with all others in the plugin directory).
This enhances readability a lot

Is there a real reason for restriction about Plugin directory ?
