Thanks, this is stupid bug indeed.

I have resolved it with this simpler/cleaner fix:

```
void ColumnList::DoLeftDown(Point p, dword flags) {
 selclick = false;
 int i = GetDragColumn(p.x);
 if(i >= 0) {
  ci = i;
  dx = p.x - GetColumnCx(0) * (i + 1);
  mpos = p.x;
  SetCapture();
  Refresh(mpos - dx, 0, 1, GetSize().cy);
  SyncInfo();
 }
 else {
  int i = GetItem(p);
  if(i >= 0 && i < GetCount() && multi && IsSel(i))
   selclick = true;
  else
   DoClick(p, flags);
 }
}

void ColumnList::LeftDown(Point p, dword flags) {
 DoLeftDown(p, flags);
}

void ColumnList::LeftDouble(Point p, dword flags) {
 DoLeftDown(p, flags);
 WhenLeftDouble();
}
```

(Moral of the story - be careful with calling virtual methods...)
