Do you mind adding a define HTML_VIEWER to the core package, which defines the HTML viewer (browser) for POSIX systems?
I don't have "htmlview" and changed it to firefox)

```
#if defined(PLATFORM_WIN32) && !defined(PLATFORM_WINCE)
 ShellExecute(NULL, "open", url, NULL, ".", SW_SHOWDEFAULT);
#endif
#ifdef PLATFORM_POSIX
 system("firefox " + url + "&");
#endif
```

Matthias
