Hi,

what means "for(;;)" ?

```
        dlg.number <<= 10;
for(;;)
 switch(dlg.Execute()) {
 case IDOK:
  PromptOK(AsString(~dlg.number));
  break;
 case IDCANCEL:
  return;
 }
```

```
        double x = Mul(p);
for(;;)
 if(p.Char('+'))
  x = x + Mul(p);
 else
 if(p.Char('-'))
  x = x - Mul(p);
 else
  return x;
```

is something defined in U++ or C++?

thanks

Yes, it is an infinite loop like a while(true).
You have a discussion about it here.
