Hello,

After spending some time with Discord, I decided to create server dedicated to U++. I know that somebody of you complaining about it in some posts and some of you are already there. It might serves us well as a substitution to our forums and GitHub. Some of our direct competitors has there servers, too. We can not be behind them

If you want to join here is the invitation link.

I am aware that our Slack is already dead, so maybe we will have more luck with Discord

Klugier

Hello,

Just a small reminder that we have our own Discord server. We currently have around 90 members, so if you'd like to join, please use the link from my first message. Also, you can use Discord badge on our website to join:
