I'm using Windows XP with MUI pack installed. When I use either
GetSystemLNG() or GetCurrentLanguage(), GetLangName() returns English.

What function do I use to retrieve the current language setting?

GetSystemLNG should work. Maybe it does not with MUI.

Could you check the GetSystemLNG code please?

Mirek

GetSystemLNG returns 0xF8320C for Polish and 0x112BAB3 for English.

LNGAsText(0xF8320C) = PL-PL windows-1250

LNGAsText(0x112BAB3) = EN-US windows-1252

What is wrong then?

I use this construction

String(ToLower(LNGAsText(GetCurrentLanguage()& 0xfffff)))

This return 'en' or 'ru' in string format.
