Subject: String filter whitespace

I just found the string filter functions, which are awesome. I made an adjustment to the whitespace filter so I can get everything before the first whitespace.

```
int CharFilterNotWhitespace(int c)
{
   return IsSpace(c) ? 0 : c;
};
```

This returns all text before the first whitespace:
FilterWhile(my_string, CharFilterNotWhitespace))
I found it very useful, maybe we should add this to the filters?
