Subject: FileSelNative() writes to LOG
Posted by pvictor on Tue, 10 Oct 2023 10:28:41 GMT

Hi!

```
#include <CtrlLib/CtrlLib.h>

using namespace Upp;

GUI_APP_MAIN {
 while (1) {
  FileSelNative fs;
  if (fs.ExecuteOpen()) // writes to LOG
   PromptOK(~fs);
  else break;
 }
}
```

FileSelNative() on Linux writes to LOG each time when ExecuteOpen is called:

```
_g_io_module_get_default: Found default implementation dconf (DConfSettingsBackend) for
'gsettings-backend'
gtk_file_chooser_widget_set_current_name: assertion 'priv->action ==
GTK_FILE_CHOOSER_ACTION_SAVE || priv->action ==
GTK_FILE_CHOOSER_ACTION_CREATE_FOLDER' failed
```

Setting:#define CATCH_ERRORS 0in GtkApp.cpp eliminates this.

Linux Mint 21.2 Victoria base: Ubuntu 22.04 jammy

Best regards,
Victor
