hello,

Skylark just got an update.

New features:

Sending file as response:

https://www.ultimatepp.org/forums/index.php?t=msg&th=116 49&start=0&
It is now possible to set a filepath as response and the file will be send to the client:

```
http.SetHeader("content-disposition", "attachment; filename=\"" + FileName
+"\"").ContentType("application/octet-stream").SendFile(FilePath,  MAX_PACKET_SIZE);
```

Handling Options and other HTTP request type:

https://www.ultimatepp.org/forums/index.php?t=msg&th=119 47&start=0&
It is now possible to handle OPTIONS, DELETE, CONNECT... request type using the same for as POST handler:

```
SKYLARK(OptionsHandler, "my_options:OPTIONS"){
 ...
}

SKYLARK(DeleteHandler, "my_delete:DELETE"){
 ...
}

SKYLARK(ConnectHandler, "my_connect:CONNECT"){
 ...
}
```

Bug fixes:

GetIdentity don't rely anymore on being first in attribute list (
https://www.ultimatepp.org/forums/index.php?t=msg&th=110 17&start=0&)

Content type filed is no longer set when it's empty(
https://www.ultimatepp.org/forums/index.php?t=msg&th=119 56&start=0&)

Doc has been updated. No new example provided.

Hi,

very good!
I'm happy to know that Skylark is not abandoned!

A long time ago, someone said: the future of an application is Web and not Desktop!
(logically, the desktop has a more secure environment!)

Tks!
