Hello,

I wish to add GraphCrtl and some other packages to UppHub, can the following json be added to the nests.json file

Edit : I created a pull request (nests.json has been checked to work properly)
Thankyou

Hello,

I just created a Pull Request on UppHub repo

Hello Dider,

I merged your PR. GraphCtrl is now available from UppHub! However, I just noticed some issues with this package:

GraphCtrl examples do not compile due to fatal error GrapCtrl "/home/klugier/upp/git/uppsrc/Draw/iml_header.h (17): fatal error: 'GraphCtrl_Demo/GraphCtrl_Demo.iml' file not found" Also when opening GraphCtrl, TimingPolicies package is missing. Did you forget to create UppHub package for it? Or it is no longer needed? GraphCtrl package shouldn't be main package since it is supportive package. You should remove "GUI SSE2" configuration

I attached screenshots with the problems described in this message to the UppHub PR #35.

Hello Klugier,

Thankyou for the addition to UppHub
I pushed the corrections for GraphCtrl_Demo package yesterday night : It was only include paths that needed to be updated when I moved my packages to the examples directory.

As for 'remove "GUI SSE2" configuration': well I've been searching for this info for a long time : I noticed that some packages were present in main packages list but didn't know what made them appear there
I will remove it and do a check on all my packages

I also need to add an introduction chapter to my documentation (and improve documentation)
