Subject: How to select a starting directory for the FileSel

Hello,

Each time I open a FileSel dialog it starts from the root of my PC. Instead I would like to set the directory from where to start. I used the method BaseDir, for example:

```
 fs.BaseDir("C:\\MyApps\\Vega2\\souceVega");
```

In this case it starts from C:\\MyApps\\Vega2\\souceVega but I cannot move back from that level because the button dirup is disabled!
So I tried

```
   fs.dirup.Enable(); //fs.dirup.Enable(true);
   fs.BaseDir("C:\\MyApps\\Vega2\\souceVega");
```

with no success. Any idea?

Moreover I would like to get my application directory to supply to FileSel but how can I get it?

Luigi

Moreover I would like to get my application directory to supply to FileSel but how can I get it?
Luigi
I get the answer! here it is:

fs.dir <<= "C:\\MyApps\\Vega2\\souceVega";

So now remain the question about the application directory

Hello,

Have you tried this?

fs.ActiveDir(".");

Best Regards,
Yeoh

Hi Yeoh,

No, but I'll try. The surprise never finish
Thanks!
Luigi

ActiveDir. But ActiveDir(".") is wrong, you should supply the real directory there, e.g. ActiveDir(GetCurrrentDirectory()).
