2-3 (ok, to be safe -5) months.

New Image is almost ready (only missing part now is about 500 lines of X11/XRender code). Then some groundwork on Chameleon and then WinCE.

Speaking about it, one thing to resolve is what compiler we will need to use...

U++ needs minimum C++ conformance at VC7.1 level. Are there any other options to VC8.0?

What one needs to buy / download in order to be able to create commandline native C++ applications for WinCE?

I have seen some GCC/ARM stuff around, any experiences anybody?
