e.g. suppose I want a customised checkbox - I create two bitmaps (checked and unchecked) that I want to switch when the image is clicked.

Graeme

BTW, you can use:

ButtonOption opt;

...

```
opt.SetImage( BmpEncoder::NewBmp()->LoadImageFile("OffIMG.bmp"),  
PngEncoder::New()->LoadImageFile("OnIMG.png") );
```

//you can choose image formats...

//don't forget to adjust sizes accordingly...
