Subject: U++ needs an IRC Channel

Most programming languages and frameworks are on irc.freenode.net.

I suggest that the authors of U++ register a #Upp channel there.

It's a good option to chat about U++ when creating a full thread at the forum is too much.

Hi lectus,

Are you aware of the #upp chanell on slashnet.org? (Webclient is available here)

Best regards,
Honza

Didn't know about it.

But still I hold my recommendation, because freenode is more popular among programmers.

It would raise U++ popularity by simply listing channels at a popular IRC network.
