Thanks for all the hard work!

I just downloaded it and am working on the ebuild. It dies compiling uppsrc/ide/Install.cpp with the follwing error:

uppsrc/ide/Install.cpp: In function 'bool Install()':
uppsrc/ide/Install.cpp:319: error: 'class Upp::Progress' has no member named 'Ad'
uppsrc/ide/Install.cpp:320: error: expected `;' before 'if'

I tried to simply add a ';' but then it complained that Ad was not a member of 'class Upp::Progress'

uppsrc/ide/Install.cpp:319: error: 'class Upp::Progress' has no member named 'Ad'

Ops. Please just delete line 319.

(So there will be rc2..

Thanks. I've just made the changes and checking the new ebuilds. I'll try to post tonight an

update of the portage tree with updates to both beta3 and rc1.

Thanks!

Yes,something looks strange,add new package failed to compiled to lib,and running debug report cannot find gdb
LINK : fatal error LNK1181: cannot open input file
'D:\Ulti\upp\out\UCompoundDoc\MSC71.Gui\UCompoundDoc.lib'
"UCompoundDoc" is the new package

Werner

Oopps. You're right.. My fault. I even know why they disapeared but I'm lazy to explain that here now Anyway that will be fixed in next release. In the meantime use templates from the last good package.
