Hi,

i try to find an example how to use OpenCV (most actual) with U++ on Linux (Ubuntu 12.04).

The Example in bazaar section is only made for Windows, i do not have any idea how to make it run on Linux.

Maybe you have an example code that work on Linux, please send the Code to the Forum.

Any help would be great.

Best Regards,

Dieter

Hi Dieter

OpenCV (most actual) with U++ on Linux (Ubuntu 12.04).

The Example in bazaar section is only made for Windows, i do not have any idea how to make it run on Linux.

Dieter

I have and had a version of Win dual boot with Ubuntu for many years. It should be just the difference in the compiler used.
OpenCV (most actual) ???

What in bazaar do you have a problem with?

Hi nlneilson,

OpenCV (most actual) ???
I would like to use the Version 2.4.9 of OpenCV.

What in bazaar do you have a problem with?
I try to build OpenCV_demo to run native on my Ubuntu 12.04 with u++ ver. 5485.

The Compiler i use is gcc 4.6, in the attached file you see the error messages i get.

Maybe i am wrong, can you help me?

Best regards,

Dieter
