I want to place a imagectrl and a button on a topwindow. This is how i tried to do it:

Add(closeBtn.SetLabel("Close AboutDialog").LeftPos(1, 20).TopPos(250, 20));

I got these error:

G:\Entwicklung\UPP\prohibisZA\aboutdialog.cpp: In constructor `AboutDialog::AboutDialog()':
G:\Entwicklung\UPP\prohibisZA\aboutdialog.cpp:13: error: stray '\184' in program
G:\Entwicklung\UPP\prohibisZA\aboutdialog.cpp:13: error: expected `)' before numeric constant
G:\Entwicklung\UPP\prohibisZA\aboutdialog.cpp:13: error: stray '\184' in program
G:\Entwicklung\UPP\prohibisZA\aboutdialog.cpp:13: error: expected `)' before numeric constant

What's the right way to do it?

Michael

You did it right, just got puzzled by Assist++:

look there, it is not regular comma, it is marker. Try to press ',' with cursor before it to find out the meaning... (it converts to ',' and selects the next parameter).

Ups.

Thanks, this works!

Michael
