Subject: PostCallback in constructor

Hi,

it seems to me that a call to PostCallback into main class (TopWindow derived) constructor doesn't work.
Is it right or am I missing something ?
It says nothing, but don't get called, in my case.
Running outside constructor (AFTER constructor has completed) works.

Ciao

Max

I would like to help, but I am not sure what you are trying to do. "call to PostCallback into main class"? Do you mean "PostCallback call that is in the constructor" or "PostCallback that is (somehow) calling constructor"?
