The current problem is to put between the menubar and the status bar a group of 4 tab pages. Each of them will contain other widgets.

did you mean this?:

```
#include <CtrlLib/CtrlLib.h>
```

```
GUI_APP_MAIN
```

```
{  
  TopWindow w;  
  TabCtrl tabs;  
  w.Add(tabs.SizePos()); //fills all available space...  
  tabs.Add("one");  
  tabs.Add("two");  
  tabs.Add("three");  
  //add more accordingly or create in a a loop...
```

```
  w.Run();
```

```
}
```
