why there is no String.MakeLower() and what are the alternatives?
btw, are there any docs for String class?

fudadmin wrote on Thu, 16 March 2006 13:02why there is no String.MakeLower() and what are the alternatives?

Too specific to be a method (so it is ToLower function instead).

See the end of CharSet.h header for alternatives.

Quote:btw, are there any docs for String class?

No, sorry.

Mirek

Thank you. I've forgotten to check "Ignore case" when searching in files...
