Hello unodgs

Using Serialize with GridCtrl I get an exception the first time the app. is opened.

The reason is that in GridCtrl::Serialize() function, there is this:

```
 else
{
 int tc;
 s % tc;
 for(int i = 1; i < tc; i++)
 {
  //String alias;
  //s % alias;
  //int n = aliases.Find(alias);
  int id;
  s % id;
  //if(id >= 0 && id < total_cols)
  s % hitems[id];
 }
}
```

As the first time, id value is undefined so I get an exception in s % hitems[id];.

Uncommenting line //if(id >= 0 && id < total_cols), the problem is solved.

Of course you're right Koldo. But there was a deeper problem with Serialize (that's why most of the code is commented) - I must refresh my memory what was it . Anyway please keep your fix locally and I'll try ASAP to make Serialize method working again.
