Subject: Proposal: U++ jobs sub-forum

Happy New Year to everyone!
Times goes, and U++ is becoming more and more mature and widely used in commercial applications. We should create place to collect all job proposals: both freelance and office.
I also believe that U++ jobs is crucial for spreading U++ among C++ professionals.

If you think U++ is not used in production - this is not true at all.
Personally I have a job proposal for russian freelancer once per every 4-5 months. Other people may have job proposals too.

So I propose adding U++ subforum to some place in forum central page (preferably not in the bottom). It can be good starting point for future.

What do you think?

I agree. It is a very good way to spread the popularity of U++ and build the user base.

It seems a good idea. And it is almost costless

I have about 10-15 projects per month, but I can't find enough programmers U++ programmers. Maybe someone can help me.

Mirek, what do you think about the proposal?
May be it is time to add jobs subforum?

IMO:

Well, status quo is that job offerings are posted in coffee corner. So far, I have not seen this forum to be overflowing in job offerings. When that happens, we can create separate forum.

mirek wrote on Tue, 10 January 2012 10:17 Well, status quo is that job offerings are posted in coffee corner. So far, I have not seen this forum to be overflowing in job offerings. May be we have no job offerings BECAUSE they're fated to be kept deep inside the forum? May I propose adding jobs subforum as an experiment for 4-6 months. And if it is still empty, you will delete it then?

to robertleu
The problem, to finish the projects actually absent. In fact takes place quite another. Work periodically comes new. It will periodically need to do. Of course I can technologically do all the work (U++ helps with repeating from project to project code), but I periodically do not have time. Work is quite inexpensive (in terms of Finance), so willing to cooperate very little. However, those projects are not public, so put them in open access is wrong. That's what I said.
