What is situation with Geom package? I can't find Geom/Draw subpackage and Plotter Ctrl in 604-dev4 version. Are they under development in uppbox repository?

Good that you ask

Frankly, I have decided to "minimize" uppsrc, and wait for complaints so that I know which packages are eventually needed to be put back....

Problem is that there is now too much unused backward compatibility stuff in TCode/TCtrlLib etc...

Now I will know what to fix and put back.

Actually, I would welcome help here - the trouble is that I have no single application using Geom to test...

Could you please try to identify dependencies of Geom/Draw, Geom/Ctrl etc... on TCtrlLib, TCtrl and TDraw? I guess there will not be many, so we will be ablo to fix that (by moving stuff to CtrlLib, Ctrl and Draw).

(Just load you app using Geom and replace #include <TCtrlLib/TCtrlLib.h> with <CtrlLib/CtrlLib.h> etc...)

Well, I don't have any real app
Last weak I wanted to start using Geom package and then I saw missing stuff. As soon as I make something with Geom package I will send problems here.
