Hi,

I've found a few problems:

1. Text is not displayed correctly if text height is bigger than cell height. You should limit y-coordinate of text to values ≥ 0 .

2. When column width is lower than text width, text in pop-up is not centered correctly, new line sign is visible.

3. Pop-up is empty when there is AttrText in cell.

Problem with pop-up is visible if font resolution is 120DPI.

Test code:

```
struct App : TopWindow
{
    typedef App CLASSNAME;
    GridCtrl grid;
    App(){
        Add(grid.SizePos());
        grid.AddColumn("Name");
        grid.AddColumn("Surname");
    }
};
```

GUI_APP_MAIN

```
{
    App a;
    a.grid.Add(AttrText("New name in cell name"));
    a.grid.Add("New name1 in cell surname\nNew name2 in cell surname2\nNew name3 in cell surname3\nNew name4 in cell surname\nNew name5 in cell surname2\nNew name6 in cell surname3\n");
    a.Run();
}
```
