Subject: ParseXmlFilter

Recently I have had some problems with very large XML files (hunderds of MB), in which I was interested in only fraction of data, while using preexisting algorithm that was using XmlNode/ParseXML.

To solve the issue, I have added new variant of ParseXML that allows to specify a filter to exclude parts of XML, e.g.:

```
  IgnoreXmlPaths
ignore("/vf:VymennyFormat/vf:Data/vf:AdresniMista/vf:AdresniMisto/ami:Geometrie;/vf:VymennyF
ormat/vf:Data/vf:Parcely");
  XmlNode n = ParseXML(LoadFile(xmlfile), ignore);
```
