Subject: Wrong application path when switching assemblies but same project

If I make 2 identical assemblies with different names and paths like:

Package Nests: /home/ruben/MyApps1;/home/ruben/upp/uppsrc;/home/ruben/upp/b azaar
Output directory: /home/ruben/.upp1/_out
Assembly Name: MyApps1

Package Nests: /home/ruben/MyApps2;/home/ruben/upp/uppsrc;/home/ruben/upp/b azaar
Output directory: /home/ruben/.upp2/_out
Assembly Name: MyApps2

The content of MyApps1 and MyApps2 is the same, except I am doing different fixes on some apps

When I now load MyApps1->SomeApp compile it, run it etc.
then load MyApps2->SomeApp then clicking on Build->Open output directory gives me the output directory in /home/ruben/.upp1/etc.....

Hello,

Maybe you should change bazzar "/home/ruben/upp/b azaar" to "/home/ruben/upp/bazaar? Please tell me dose it change anything?

You can also try to change output directory for second assembly form "Output directory: /home/ruben/.upp2/_out" to "Output directory: /home/ruben/.upp1/_out" (The same output directory as first assembly).

* I have never changed output directory for my newly assembly, so maybe it can causing problems. Please test with the same output directories.

Sincerely,
Klugier
