Hi,

after pkg update && pkg upgrade i have error:

redefinition of 'FT_MemoryRec_' when i compile any project.

FT_MemoryRec_ is defined into FT_fontsys/ftsystem.h and freetype/ftsystem.h

Best Regards.

redefinition of 'FT_MemoryRec_' when i compile any project.

FT_MemoryRec_ is defined into FT_fontsys/ftsystem.h and freetype/ftsystem.h
The patch for devel/upp port is already proposed on FreeBSD Bugzilla (PR 207979).
I think, this issue was related to freetype2 v2.6.3 update. It was fixed on U++ repository about 3 weeks ago.

The complete port with changes attached to the message, just in case.

Edit:
Proposed patch was committed. Attachment removed.
