```
w.mc1.Add(w.s1);
w.s1.SetPos(w.s1.PosLeft(5, 15), w.s1.PosTop(20, 5));
```

Can be done with less typing (and typos) as

```
w.mc1.Add(w.s1.LeftPos(5, 15).TopPos(20, 5));
```

Of course, one can still use layout here too
