I propose to add 2 new callbacks:
Callback OnSetRange;
Callback OnSetXYMin;

This callbacks are need when synchronize 2 scatter controls.

Flat files are attached!

Best Regards, Ion Lupascu (tojocky)

P.S. A also propose to add new methods:
double GetXMinUnit () const {return xMinUnit;}
double GetYMinUnit () const {return yMinUnit;}

All the changes are in attached files!
Hello Ion

Perfect.

Is it better WhenSetRange than OnSetRange?. I think When is more used in callbacks.

OK, It is perfect!
