tojocky wrote on Mon, 28 February 2011 15:00Another Idea:

- Name:

IPC(Inter-process Communication) using named pipes (local host) and socket (network)

- Proposed by:

Ion Lupascu

My 2 cents: We could even benefit from using the ZeroMQ framework here, that makes an awesome abstraction of IPC/sockets/whatever layers...

I dream of seeing ZeroMQ wrappers in U++. Some C++ bindings already exist.
