Hello Navi

I am not sure if this can serve you but in U++ there is a FileMove() function. Please check it if there is anything useful for you:

```
bool FileMove(const char *oldname, const char *newname)
{
    #if defined(PLATFORM_WIN32)
        if(IsWinNT())
            ...
    else
        return !!MoveFile(ToSystemCharset(oldname), ToSystemCharset(newname));
    #elif defined(PLATFORM_POSIX)
        ...
    #else
        ...
    #endif//PLATFORM
}
```
