ahhhh ! I guess that one is the problem... if you look on MSC command line you'll see :

```
cd c:\users\massimo\sources\upp-svn\bazaar\OCE
```

```
Creating library...
```

```
link /lib -nologo
```

```
@C:\Users\Massimo\AppData\Local\Temp\4EB3709D3C0500B6545D5EB637FEBD0C.tmp
```

I guess mingw uses another command for lib building, which is unaffected by my patch, so gets the whole (too long) commandline.

Max
