
Subject: GridCtrl: Repaint bug?

Hello,

I have a gridctrl that is sorted via a multisort each time it is feeded.

Unfortunately the grid is multisorted ONLY the first time.

Look at the first picture:

I click the left grid (third row) and some data go in the right grid that is sorted as I want with this code in the callback

```
...
arrPlayer.MultiSort(1, GridCtrl::SORT_DOWN)
    .MultiSort(2, GridCtrl::SORT_DOWN)
    .MultiSort(0, GridCtrl::SORT_UP);
arrPlayer.Repaint();
...
```

Now, if I repeat the same operation (Clear the grid and feed again with the same data) I get this result

So the TB column (the second one to be sorted) is not sorted properly.

I do not know if this is a Repaint() problem or I need to restart/reset in some way the grid in order to be ready to perform a new multisort.

Thanks,
luigi
