Hi, Mirek

Quote:
I think this should be more flexible (not coupled to filesystem), something like

HttpRequest& PostStream(Stream& s, int64 len = Null);

Great! That is better than mine.

Quote:I would also like to ask what is the deal with all that padding code?
I am just try to make the two different part of the data combined as if they are the same continuous data, but i am really not sure if it is necessary.

Quote:I have tried that altered variant, please check it that is OK.
I will check it, and thanks a lot.
