Novo wrote on Wed, 18 November 2015 06:14 This is how menu looks on my Windows laptop with resolution 1920x1080 and scaling slider set between Smaller and Larger (I couldn't figure out exact percentage, I think it is 125%, or I just increased default font size (it is 11 in my case)). It doesn't look right to me ... IMHO, icons should be resized and centered.

Thanks.

Icons can only be resized 2x, otherwise it looks too ugly.

Will check visuals (centering).
