---

It seems my updating MSVC 2012 to 2015 is the cause as the error is Invalid build method. It cannot find a correct compiler.

After installing MSVS 15 three times and the repair twice up cannot find a compiler.

I must have updated up 30 plus times from before 5000 to 6163 and MSVS from 8, 10, to 12 without a problem. The last time installing MSVS 15 was with the default setup. Should I try downloading and installing the MS C++ compiler?
