Hi,

I solved gdb demangling issue on Ubuntu 14.04 by downloading latest 7.11.1 gdb source code and rebuilding the gdb.

BR, Radek

```
#!/bin/bash
```

```
sudo apt-get install texinfo
```

```
# build gdb source code  
cur_dir=`pwd`
```

```
mkdir -p /var/tmp/gdb-build  
cd /var/tmp/gdb-build  
wget -nc http://ftp.gnu.org/gnu/gdb/gdb-7.11.1.tar.gz  
tar xf gdb-7.11.1.tar.gz  
cd gdb-7.11.1  
./configure  
make  
sudo make install
```

```
cd $cur_dir
```
