luzr wrote on Sun, 27 August 2006 14:15 Thanks, that is exactly I need

BTW, what is the unicode range for those "double-mono" spaced characters? (In other words, range for chinese glyphs..)

Another question: Is GBK needed in Linux too? Or they are wisely UTF-8 now?

Mirek

Sorry, I don't know it so detail, but maybe this can help:

<http://www.unicode.org/charts/PDF/U4E00.pdf>

<http://www.unicode.org/charts/>

<http://www.unicode.org/charts/unihan.html>

<http://sourceforge.net/projects/fontmanager>

<http://sourceforge.net/projects/cce2k>

normally, you can deal with CJK at the same way
