When compiling in TheIDE (W10), if the TheIDE window is minimized, if after the compiling the window is maximized, warnings appear in vertical, like if a \n would be added after every letter.

The screenshot shows a code editor window with the following C++ code snippet:

```
String sfreqs;  
for (int i = 0; i < freqs.GetCount(); ++i) {  
    if (!sfreqs.IsEmpty())  
        sfreqs << " ";  
}
```

Below the code editor, a warning message is displayed in a yellow box. The message is:

File	Line	Message (745 warnings)
RichText/Para.h	168	w a r n i n g : u n u s e d p a r a m e t e r , b a r :

The warning message is displayed vertically, with each character on a new line, as described in the text above.
